Lasker, R. D., & Weiss, E. S. (2003). Broadening Participation in Community Problem Solving: a Multidisciplinary Model to Support Collaborative Practice and Research. *Journal of Urban Health: Bulletin of the New York Academy of Medicine*, 80(1), 14-47. doi:10.1093/jurban/jtg014

**Abstract:**

**The main idea of this article is to illustrate a model developed in 2003 to improve community collaboration to solve community health problems in the United States. The main obstacle to community collaboration is that people are from different backgrounds and context and are able to contribute in a limited amount in their own domain. This model could potentially be applied to other countries and solve multiple other problems, thereby help accelerate the process of addressing numerous social problems along with incorporating as many people as possible.**
